April 1, 2022

The Honorable Ken Calvert
2205 Rayburn
Washington, DC 20515

Dear Congressman Calvert:

I am writing to thank you for your support of the Riverside County Flood Control and Water Conservation District’s (District’s) Murrieta Creek Flood Protection, Environmental Restoration and Recreation Project (Project) and to request your assistance in supporting the U.S. Army Corps of Engineers’ (Corps) FY 2023 Investigation funding request for $500,000 to continue the Corps' General Re-Evaluation Report (GRR) work. In addition, we are requesting $10,200,000 in Corps FY 2023 Construction funding to update the previously completed Phase 2B construction drawings to reflect as-built Phase IIA conditions and support Phase 2B construction initiation. We are asking for these funds to be included in the Corps of Engineers' portion of the FY 2023 Energy and Water Development Appropriations Bill.

The District has been working closely with the Corps Los Angeles District to prepare the Project for Phase 2B construction. As a result of these efforts, Phases I and IIA sediment removal was completed in December 2021 and Phase IIA of the Project was completed in January 2022. The District now excitedly awaits the final Phase I and IIA Operation and Maintenance Manual, which is expected shortly. In summary, the Project is now ready for Phase IIB construction funding.

This funding request also benefits census tracts that are defined as being moderate to high socially vulnerable based on the Center for Disease Control's (CDC) analysis of the following four criterion: Socioeconomics, Household Composition & Disability, Minority Status & Language, and Housing Type & Transportation. These vulnerable communities remain at risk to flood hazards until this important project is completed. The Project will also benefit these communities by providing enhanced environmental habitat, recreational trails, and parks.
TheHonorable Ken Calvert
April 1, 2022
Page 2

The full federal/local investment in the Project will provide:

- Protection of nearly 600 structures worth $1.35 billion;
- Protection of a five million gallons per day wastewater treatment plant serving over 40,000 residents;
- Flood risk reduction to Marine Corps Base Camp Pendleton;
- Creation of habitat for several federally endangered species, including least Bell’s vireo and Southwest Willow Flycatcher;
- Creation of four miles of continuous habitat corridor within the channel and 160 acres of habitat creation and restoration within the Phase 3 Basin;
- Important connectivity between the Santa Rosa Plateau Ecological Reserve and the Santa Margarita Ecological Reserve envisioned by the Western Riverside County Multiple Species Habitat Conservation Plan; and
- Over four miles of continuous trails along the channel and over 40 acres of active park use within the Phase 3 Basin.

The Project continues to have strong community support due to regional and national flood protection, environmental restoration, and recreation benefits. This support is demonstrated by the attached Legislative Platform excerpts and Resolutions from the County and City of Temecula.

I greatly appreciate your past and ongoing support of the Project and appreciate your support of our funding request to advance the Project.

Please feel free to contact Jason Uhley if you have any questions at 951.955.1250 or JUhley@rivco.org.

Sincerely,

[Signature]

Matt Rahn
Mayor

FEDERAL FUNDING FOR FLOOD DAMAGE REDUCTION PROJECTS (FEDERAL)

ISSUE
The District relies on annual federal funding appropriations providing funding to the Corps of Engineers for projects authorized in the bi-annual federal Water Resource Development Act, and other bills to assist with construction and emergency repair of critical stormwater management projects. Federally funded projects include: the Santa Ana Mainstem Project; Mirrieta Creek Flood Protection; Environmental Restoration and Recreation Project; Santa Ana River Levee Repair Project and emergency projects associated with the 2019 Valentine’s Day storm.

The District currently partners with federal agencies, including FEMA and the US Army Corps of Engineers (USACE) to deliver flood infrastructure of national interest in Riverside County. These projects, totaling over $500 million in combined infrastructure value, are dependent on annual appropriations from Congress and Work Plan approvals and inclusion from agencies including the Office of Management and Budget, FEMA and the Army Corps. It is important that the District work with the agencies and the local Congressional delegation to ensure that the project requirements and funding needs are understood and properly incorporated into federal agency funding requests and congressional legislation.

ACTION
- Ensure that the implementation of the Water Resources Development Act, Stafford Act and other federal authorization and budget bills benefits/addresses Riverside County Flood Control issues, projects and programs.
- Support funding and completion of vital flood and water infrastructure projects including the Santa Ana Mainstem Project, Mirrieta Creek Project, the Santa Ana Levee Restoration project and recent emergency projects responding to federally declared disasters.
- Support for efforts through the Corps, Assistant Secretary of the Army (Civil Works) and the Office of Management and Budget to include funding on a project basis for the District’s projects in the Corps’ annual Work Plans.

ENSURE EFFECTIVE AND APPROPRIATE ENVIRONMENTAL LAWS AND REGULATIONS (FEDERAL)

ISSUE
District operations can be impacted by changes to the Endangered Species Act, the Clean Water Act, and other federal laws, rules and regulations. For example, proposed changes to the federal definition of “Waters of the United States” under the Clean Water Act could have significant impacts on District Clean Water Act Section 404 permitting needs and costs. Additionally, District maintenance projects are also subject to renewable environmental permits that may require new mitigation expenditures for each permit renewal – even in cases where the maintenance regimen does not change. The imposition of new mitigation requirements as part of each permit renewal significantly increases maintenance costs and is an unnecessary byproduct of federal agency interpretation of regulations. Riverside County Flood Control operations are impacted by the Clean Water Act, the Endangered
CITY OF TEMECULA

2022 STATE AND FEDERAL LEGISLATIVE PLATFORM

Approved: January 18, 2022

The Legislative Platform is a tool to protect and promote the City's interests on priority issues and legislative/regulatory matters that may impact the City at the state and federal level. The guiding principles and policy statements below allow City staff and legislative advocates to address legislative and regulatory issues in a timely and directed manner, without precluding City Council consideration of additional legislative matters arising throughout the year. This platform supplements existing City Council established goals and policies in various documents including the City's General Plan and Quality of Life Master Plan (QLMP).

GUIDING PRINCIPLES

I. Preservation of Local Control
Support measures that preserve and protect the City's general law powers and duties to enact legislation and policy direction concerning local affairs. Oppose measures that preempt local authority.

II. Promotion of Fiscal Stability
Support measures that promote fiscal stability, predictability, and financial independence. Support measures that preserve and promote the City's revenue base. Oppose measures that mandate costs with no guarantee of local reimbursement or offsetting benefit. Oppose measures that shift local funds to the county, state or federal government, without offsetting benefit.

III. Support Funding Opportunities
Support measures that allow the City to compete for its fair share of regional, state and federal funding including competitive grants and other funding programs. Support measures that promote dedicated funding streams at the regional, state and federal levels allowing the City to maximize local revenues, offset and leverage capital expenditures, and maintain City goals and standards.
General Policy Statements:

- Support legislation that increases local control and limits additional financial burdens related to employee relations and collective bargaining that can be appropriately negotiated at the bargaining table.

City-Specific Policy Statements:

- Resolution No. 97-77 – Support legislation that preserves the ability of local, regional and state government to contract with private firms on a competitive basis to design projects.

ENVIRONMENTAL QUALITY

General Area of Review: Air, water and water quality, climate change, CEQA, integrated waste management, hazardous materials, coastal issues, and utilities.

General Policy Statements:

- Support legislation and funding to create a sustainable and stable water supply, encourage conservation of water resources and reduce urban runoff pollution.
- Support legislation and funding for renewable energy and advanced technologies that reduce energy use while providing a public benefit that is greater than the cost of compliance.
- Support legislation and funding for local government energy efficiency and renewable energy programs.
- Support legislation and funding for recyclable materials markets while maintaining local authority and flexibility to regulate solid waste and recyclables.

City-Specific Policy Statements:

- Resolution No. 95-37 – Support legislation that provides adequate safeguards to ensure conservation of threatened and endangered wildlife resources while balancing significant quality of life and financial impacts on local communities.
- Resolution Nos. 96-126 and 97-59 – Support legislation and funding for flood control and prevention programs, including those that affect Murrieta Creek and Temecula Creek.
- Resolution Nos. 98-36 and 08-78 – Support legislation and funding for the development of new technology to promote clean fuel and combat air pollution while providing a public benefit that is greater than the cost of compliance.
- Resolution No. 99-49 – Support legislation and funding for a safe, clean and reliable water supply for California.
- Resolution No. 08-77 – Support legislation that reduces emissions from marine vessels affecting air quality while providing a public benefit greater than the cost of compliance.
- Resolution No. 11-81 – Support legislation to expand wilderness areas that enhance local tourism and improve recreational opportunities for future generations.

Resolution No. 97-59
RESOLUTION NO. 97-59

A RESOLUTION OF THE CITY COUNCIL OF THE CITY OF TEMECULA
SUPPORTING SB 312 - ADDING DIVISION 26 TO THE WATER CODE
(COMMENCING WITH SECTION 79000) FLOOD PREVENTION BOND
ACT OF 1998

The City Council of the City of Temecula does resolve, determine and order as follows:

WHEREAS, SB 312 providing for financing Flood Control and Prevention Program and
Flood Prevention Bond Act is being considered by State Legislature; and,

WHEREAS, this legislation when adopted will pave the way for the people in California
to approve funding for the Flood Control and Prevention Programs; and,

WHEREAS, Portions of the City of Temecula are threatened annually by the streams
running through the City and have frequently flooded residential and commercial areas of the City
as a direct result of inadequate flood protection from Murrieta Creek and Temecula Creek; and,

WHEREAS, millions of dollars in property damage has been sustained in the several
recent incidents of flooding due to lack of adequate flood protection; and

WHEREAS, funding of these necessary improvements on these streams to provide the
health, safety, and welfare of the citizens of this community is beyond the means of the local
agencies;

NOW, THEREFORE be it resolved that the City Council of the City of Temecula support
the passage of SB 312.

PASSED, APPROVED AND ADOPTED by the City Council of the City of Temecula
on the 10th day of June, 1997.

Patricia H. Birdsall, Mayor

ATTEST:

June S. Greek, CMC/AAE

ABSENT:  0  COUNCILMEMBERS:  None

June S. Greek, CMC/AAE
City Clerk
Attachment 3

Resolution No. 96-126
RESOLUTION NO. 96-126

WHEREAS, the City Council feels it is imperative that flood protection caused by severe rainstorms be provided along Murrieta Creek "The Creek", and

WHEREAS, during the rainstorms of January through March 1993, Old Town Temecula suffered closed streets, loss of east/west access, flooding of homes and commercial entities, damage to properties, a need for emergency personnel around the clock, to establish both an Emergency Operating Center and Disaster Shelter, and

WHEREAS, the threat of flooding discourages building construction and forces property owners to purchase special flood insurance on occupied buildings, and

WHEREAS, flood protection will promote economic development and multi-purpose recreational amenities along the Creek's 11.5 mile corridor, and

WHEREAS, the City Council considers the improvement of the Creek as one of its highest priority capital project needs.

NOW THEREFORE, BE IT RESOLVED, that the City Council of the City of Temecula does hereby request the urgent support of Congressman Ken Calvert, Congressman Ron Packard, Riverside County Flood Control and Water Conservation District, and the Riverside County Board of Supervisors to assist the Cities of Murrieta and Temecula and its constituency towards:

1. Congressional funding need estimated at a $45 million.

Riverside County Flood Control and Water Conservation District's focused efforts at streamlining its process for urgently needed protection along the Creek.

Declaration by the Board of Supervisors that Murrieta Creek is its highest priority flood control need for Federal funding within Riverside County.
Recognition of the need for urgent consideration be given by the Board of Supervisors to establish a time frame for construction of the proposed detention and desilting basin at Cherry Street and Jefferson Avenue to provide early protection.

That design, environmental permitting, right of way engineering and other tasks be assisted by consultant help and be scheduled and performed on a parallel track, rather than a sequential one, where possible.

PASSED, APPROVED AND ADOPTED, by the City Council of the City of Temecula at a regular meeting held on the 22nd day of October, 1996.

Resol96-126

June S. Greek, ~ City Clerk
The Honorable Ken Calvert  
2205 Rayburn Building  
Washington, DC 20515  

Dear Congressman Calvert:  

I am writing to thank you for your support of the Riverside County Flood Control and Water Conservation District (District) Murrieta Creek Flood Protection, Environmental Restoration and Recreation Project (Project) and to request your assistance in supporting the U.S. Army Corps of Engineers’ (Corps) request for $500,000 in the Corps FY 2023 Investigation funding for the continuation of the General Re-Evaluation Report (GRR). In addition, we are requesting further support with including $10,200,000 in funding for the Project in the Corps FY 2023 Construction funding to update the previously completed Phase 2B construction drawings to reflect as-built Phase IIA conditions and support initial construction funding of the Phase 2B improvements. We are asking for these funds to be included in the Corps of Engineers’ portion of the FY 2023 Energy and Water Development Appropriations Bill.  

The District has been working closely with the Corps Los Angeles District to move the Project forward on an aggressive schedule to bring much needed flood protection to the community. As a result of these efforts, Phases I and IIA sediment removal is complete as of December 2021 and Phase IIA of the Project is complete as of January 2022. We are now excitedly awaiting the Phase I and IIA Operation and Maintenance Manual so that the Corps can turn Phases I and IIA over to the District, and the District can in turn work with the City of Temecula to open the Phase I and IIA trails to the public.  

Completion of Phase IIB of the Project will also benefit census tracts that are defined as being moderate to high socially vulnerable based on the Center for Disease Control's (CDC) analysis of the following four criterion: Socioeconomics, Household Composition & Disability, Minority Status & Language, and Housing Type & Transportation. These vulnerable communities remain at risk to flood hazards until this important project is completed. The Project will also ultimately provide enhanced environmental habitat, recreational trails, and parks that will benefit these communities.  

The full federal/local investment in the Project will provide:  

- Protection of nearly 600 structures worth $1.35 billion;  
- Protection of a five million gallons per day wastewater treatment plant serving over 40,000 residents;  
- Flood risk reduction to Marine Corps Base Camp Pendleton;  
- Creation of habitat for several federally endangered species, including least Bell’s vireo and Southwest Willow Flycatcher;
• Creation of four miles of continuous habitat corridor within the channel and 160 acres of habitat creation and restoration within the Phase 3 Basin;
• Important connectivity between the Santa Rosa Plateau Ecological Reserve and the Santa Margarita Ecological Reserve envisioned by the Western Riverside County Multiple Species Habitat Conservation Plan; and
• Over four miles of continuous trails along the channel and over 40 acres of active park use within the Phase 3 Basin.

The Project continues to have strong community support due to regional and national flood protection, environmental restoration, and recreation benefits. This support is demonstrated by the attached Legislative Platform excerpts and Resolutions from the County, District, and City of Temecula.

I greatly appreciate your past and ongoing support of the Project and appreciate your support of our funding request to advance the Murrieta Creek Flood Protection Project.

Please feel free to contact me if you have any questions.

Very truly yours,

JASON E. UHLEY
General Manager-Chief Engineer
