RE: Community Project Funding Letter of Support for LLUMC - Murrieta

Dear Representative Calvert:

On behalf of Murrieta Valley Unified School District, I write today in strong support for Loma Linda University Medical Center - Murrieta's (LLUMC - Murrieta) request for Community Project Funding appropriations. LLUMC - Murrieta provides lifesaving care to the communities of Southwest Riverside County with a focus on health and safety.

The proposed project, for construction and equipment for additional inpatient beds at LLUMC - Murrieta will address a significant need to increase capacity and access to medical care for our growing region. With only 111 licensed beds and serving over 500,000 residents of Southwest Riverside County, LLUMC - Murrieta has far outgrown their current space. During various surges of the pandemic, they were running in excess of 200% of licensed bed capacity to meet the public health crisis. While they have converted a number of single occupancy rooms to double occupancy already, demand continues to outstrip supply. Even after resuming a new sense of normalcy, they still have more patients than they have rooms for. With space to provide care at a premium, without federal investment LLUMC - Murrieta will find it challenging to meet the growing needs of the community.

The community that LLUMC - Murrieta serves is among the most vulnerable in the state, with Riverside and San Bernardino counties ranked 50th and 51st out of 58 in terms per capita income. Overall, per capita income here is 25 percent below the national average and percentage of residents living below the poverty line is well above the national rate.

Federal funds will make it possible to move forward with this critical expansion project to increase patient capacity. My organization urges your office to support this request to provide increased access to care so LLUMC - Murrieta can better serve our region for many years to come.

Sincerely,

A handwritten signature in blue ink that reads "Patrick Kelley".

RE: Community Project Funding Letter of Support for LLUMC - Murrieta

Dear Representative Calvert:

On behalf of Assistance League of Temecula Valley, I write today in strong support for Loma Linda University Medical Center - Murrieta's (LLUMC - Murrieta) request for Community Project Funding appropriations. LLUMC - Murrieta provides lifesaving care to the communities of Southwest Riverside County with a focus on health and safety.

The proposed project, for construction and equipment for additional inpatient beds at LLUMC - Murrieta will address a significant need to increase capacity and access to medical care for our growing region. With only 111 licensed beds and serving over 500,000 residents of Southwest Riverside County, LLUMC - Murrieta has far outgrown their current space. During various surges of the pandemic, they were running in excess of 200% of licensed bed capacity to meet the public health crisis. While they have converted a number of single occupancy rooms to double occupancy already, demand continues to outstrip supply. Even after resuming a new sense of normalcy, they still have more patients than they have rooms for. With space to provide care at a premium, without federal investment LLUMC - Murrieta will find it challenging to meet the growing needs of the community.

The community that LLUMC - Murrieta serves is among the most vulnerable in the state, with Riverside and San Bernardino counties ranked 50th and 51st out of 58 in terms per capita income. Overall, per capita income here is 25 percent below the national average and percentage of residents living below the poverty line is well above the national rate.

Federal funds will make it possible to move forward with this critical expansion project to increase patient capacity. My organization urges your office to support this request to provide increased access to care so LLUMC - Murrieta can better serve our region for many years to come.

Sincerely,

Denise Lanier, President
